Date: May 10, 2016
Subject: First-Time College Students Placement \& Enrollment by Ethnicity
In spring 2016, De Anza College implemented its multiple measures assessment pilot (MMAP). The pilot targets first-time college students and this report provides context regarding their placement and enrollment by ethnicity for the fall periods: 2013, 2014, and 2015. Unless specified, analyses are averages of these three fall terms.

## Key Findings

Overall Placement and Enrollment

- The majority of first-time college students placed into basic skills versus college level: English (64\% vs. $33 \%$ ), Reading ( $65 \%$ vs. $33 \%$ ), and Math ( $76 \%$ vs. $14 \%$ ).
- Most first-time college students enrolled in the course in which they placed-enrollment rates for basic skills and college level are $78 \%$ and $79 \%$, respectively.

## Placement by Ethnicity

- 71\% of basic skills English, Reading, and Math placement are comprised of Latino/a and Asian.
- $63 \%$ of college level English and Reading placement consists of Latino/a and Asian, and $64 \%$ of college level Math placement is comprised of Asian.
- Latino/a students exhibit disproportionate impact as evident by their placement into basic skills versus college level: English ( $43 \%$ vs. $26 \%$ ), Reading ( $42 \%$ vs. $27 \%$ ), and Math ( $42 \%$ vs. $10 \%$ ).
- African American students are more likely to place into basic skills than college level for English ( $5 \%$ vs. $3 \%$ ) and for Math ( $5 \%$ vs. $1 \%$ ). There was no difference observed for Reading placement.
- Filipino students are less likely to place into basic skills than college level English (9\% vs. $11 \%$ ) and more likely to place into basic skills Reading than EWRT 1A ( $10 \%$ vs. $9 \%$ ). There was no difference observed for Math placement.
- Asian and White students are less likely to place into basic skills than college level for English (41\% vs. $57 \%$ ) and Reading ( $41 \%$ vs. $59 \%$ ). For Math, Asians are less likely to place into basic skills than college level ( $27 \%$ vs. $64 \%$ ), whereas Whites are more likely to place into basic skills, $14 \%$ vs. $12 \%$.

## Enrollment in Course in which Placed by Ethnicity

Overall, the majority of students enrolled in the basic skills/college level course in which they placed.
Some exceptions include the following:

- Latino/a students enrolled at a lower percentage compared to their placement representation. For English, they account for $43 \%$ of basic skills placement but $41 \%$ of its enrollment, and $26 \%$ of college level placement but $24 \%$ of its enrollment. For Reading, Latino/a students account for $42 \%$ of basic skills placement but $39 \%$ of its enrollment, and $27 \%$ of EWRT 1A placement but $26 \%$ of its enrollment.

## Key Findings (continued)

- Asian students enrolled at higher percentages compared to their placement representation. For English, they account for $30 \%$ of basic skills placement and $32 \%$ of its enrollment, and $36 \%$ of college level placement and $39 \%$ of its enrollment. The same observation was noted for Reading. Asian students account for $31 \%$ of basic skills Reading placement and $34 \%$ of its enrollment, as well as $36 \%$ of EWRT 1A placement and $38 \%$ of its enrollment.

## First-Time College Student Placement \& Enrollment

## Took Placement Test ${ }^{1}$

- Each fall term, there are about 3,700 first-time college students. The majority of these students (75\%) took an English, Reading, or Math placement test.

## Placement Results ${ }^{2}$

- 65\% of students placed into basic skills English and Reading and 33\% placed into EWRT 1A
- $2 \%$ were recommended to take the ESL placement test
- $76 \%$ placed into basic skills and $14 \%$ placed into college level Math
- $10 \%$ placed into pre-calculus or calculus

## Enrolled in the Course in which Placed ${ }^{3}$

- Most students enrolled in the course in which they placed.
- English: $81 \%$ enrolled in basic skills and $75 \%$ enrolled in college level
- Reading: 69\% enrolled in basic skills and 77\% enrolled in EWRT 1A
- Math: $83 \%$ enrolled in basic skills and $85 \%$ enrolled in college level

## First-Time College Student Placement \& Enrollment

## English Placement: Ethnic Composition of Basic Skills vs. College Level

- Latino/a and Asian students make up the majority placed into basic skills and college level English, 73\% and 62\%, respectively.
- African American and Latino/a students are more likely to place into basic skills than college level English. The opposite was observed for Filipino students.
- African American: basic skills 5\% vs. college level 3\%
- Latino/a: basic skills $43 \%$ vs. college level $26 \%$
- Filipino: basic skills 9\% vs. college level $11 \%$
- Fewer Asian and White students are placed into basic skills (41\%) than college level English (57\%).

Figure 2

English Placement by Ethnicity
Figure 3 provides the ethnic breakout of De Anza's student population and compares it against their English placement.

- Latino/a students account for $26 \%$ of the student population, but $43 \%$ of basic skills and $26 \%$ of college level English placement.
- Filipino students account for $7 \%$ of the student population, $9 \%$ of basic skills, and $11 \%$ of

Figure 3
 college level English placement.

- African Americans account for $4 \%$ of the student population, $5 \%$ of basic skills, and $3 \%$ of college level English placement.
- Asians account for $38 \%$ of the student population, $30 \%$ of basic skills, and $36 \%$ of college level English placement. White students are also more likely to place into college level; they account for $21 \%$ of the student population and $21 \%$ of college level English placement compared to $11 \%$ of basic skills placement.

## Enrolled in English Course in which Placed

- Latino/a students enrolled at a lower percentage than their placement representation in basic skills ( $43 \%$ placed and $41 \%$ enrolled) and in college level English ( $26 \%$ placed and $24 \%$ enrolled).
- Asian students enrolled at a higher percentage than their placement representation in basic skills ( $30 \%$ placed and $32 \%$ enrolled) and in college level ( $36 \%$ placed and $39 \%$ enrolled).

Reading Placement: Ethnic Composition of Basic Skills vs. College Level

- Latino/a and Asian students comprise the majority placed into basic skills Reading (73\%) and EWRT 1A (63\%).
- There are more Filipino and Latino/a students placed into basic skills Reading than EWRT 1A, whereas African American students are just as likely to place into basic skills as EWRT 1A.
- Filipino: $10 \%$ basic skills vs. $9 \%$ college level
- Latino/a: $42 \%$ basic skills vs. $27 \%$ college level
- African American: 4\% basic skills and 4\% college level
- Asian and White students are more likely to place into EWRT 1A (59\%) than basic skills (41\%).

- Asians account for $38 \%$ of the student population, $31 \%$ of basic skills, and $36 \%$ of EWRT 1A placement. White students are also more likely to place into EWRT 1A; they account for $21 \%$ of the student population and $23 \%$ of EWRT 1A placement but only $10 \%$ of its basic skills placement.

## Enrolled in Reading Course in which Placed

- African American and Filipino students are just as likely to enroll in basic skills Reading as they are in EWRT 1A. African Americans account for 4\% of basic skills Reading placement and 4\% of its enrollment. The same observation is noted for their EWRT 1A placement and enrollment. On the other hand, Latino/a students enrolled at a lower percentages compared to their placement representation. They account for $42 \%$ of basic skills placement but $39 \%$ of its enrollment, and $27 \%$ of EWRT 1A placement but $26 \%$ of its enrollment.
- Asian students enroll at higher percentages than their placement. They account for $31 \%$ of basic skills placement and $34 \%$ of its enrollment, and $36 \%$ of EWRT 1A placement and $38 \%$ of its enrollment.

## Math Placement: Ethnic Composition of Basic Skills vs. College Level

- Latino/a (42\%) and Asian (27\%) comprise the majority of students placed into basic skills Math.
- Asian students (64\%) account for the majority of students placed into college level Math, whereas 1 in 10 Latino/a students is placed into college level Math.
- There are more African American and Latino/a students placed into basic skills than college level Math. Filipino students are just as likely to place into basic skills as college level Math.
- African American: basic skills 5\% vs. college level 1\%
- Latino/a: basic skills $42 \%$ vs. college level $10 \%$
- Filipino: basic skills 9\% vs. college level 9\%
- Asian students are more likely to place into college level (64\%) than basic skills Math (27\%). The reverse was observed for White students ( $12 \%$ college level and $14 \%$ basic skills).

Figure 6

## Math Placement by Ethnicity

- Latino/a students account for $26 \%$ of the student population, but $42 \%$ of basic skills and $10 \%$ of college level Math placement. Similarly, African Americans are more likely to place into basic skills Math; they account for $4 \%$ of the student population, $5 \%$ of basic skills but only $1 \%$ of college level Math placement.
- Filipino students account for
