Subject: Analysis of Success Rates after AB705 Changes for DSPS Students - Fall 2019

This analysis compares success rates in EWRT1A, EWRT1A + LART250 (Bundle) and EWRT1AS (Stretch) as well as MATH10, MATH10 + MATH210X, MATH10.MPS and MATH41, MATH41 + MATH231, MATH41.MPS and MATH1A courses over the past five fall terms for DSPS students. Data is disaggregated by disability type and course type.

Success include A, B, C, and P grades, Non Success include D, F, NP, FW and I grades, while Withdraw includes W, MW and EW grades. The success rate is the number of $A, B, C, P$ grades divided by total enrolled students in the course. Withdraw are students who withdrew from the course after census through week 8 and received a W grade.

## Highlights Include:

## EWRT1A

- DSPS students on average exhibited somewhat lower success rates than their counterparts historically in EWRT1A. However, in fall 2019, success rates for DSPS students were 18 percentage points lower than their counterparts. The success rates are lowest for DSPS students in the Bundle course at $44 \%$ success. However, DSPS students in a Bundle section that was part of a learning community had a success rate of $78 \%$, this is also the case for DSPS students in the stretch course as a learning community with success rates at $86 \%$. Therefore, the learning community structure seems to be working very well for DSPS students in EWRT1A.

## MATH10

- DSPS students overall exhibited a lower success rate than their counterparts historically in MATH10, but in fall 2019, success rates were very similar between the two groups. Students in MPS sections of MATH10 had the highest success rates at 73\% compared to DSPS students in the corequisite course at $44 \%$. Therefore, the MPS format seems to be working well for DSPS students.

## MATH41 and MATH1A

- DSPS students on average exhibit lower success rates than their counterparts, though in fall 2019, \} DSPS students exhibited a success rate 10 percentage points higher than their non-DSPS counterparts. Though students in the standalone MATH41 course had higher success rates than students in the MPS section in this case.
- DSPS students, on average have higher success rates than non-DSPS students in MATH1A and this continued to be the case for fall 2019.

Table 1. EWRT1A - Success by DSPS Status
$\left.\begin{array}{llr|r} & & \text { Success } & \% \\ & & \text { Enrollment } & \text { Count } \\ \text { Success }\end{array}\right]$

- When comparing DSPS students to non-DSPS students in EWRT1A courses, DSPS students on average exhibited somewhat lower success rates than their counterparts historically. However, in fall 2019, success rates for DSPS students were 18 percentage points lower than their counterparts.

Table 2. EWRT1A - Success by DSPS Status - Fall 2019

|  | Success |  | Non Success |  | Withdraw |  | Total |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| DSPS Students | Grades | Percent | Grades | Percent | Grades | Percent | Grades | Percent |
| EWRTIA Stretch | 8 | $73 \%$ | 3 | $27 \%$ | 0 | $0 \%$ | 11 | $100 \%$ |
| EWRTIA Bundle | 16 | $44 \%$ | 16 | $44 \%$ | 4 | $11 \%$ | 36 | $100 \%$ |
| EWRTIA Standalone | 27 | $71 \%$ | 5 | $13 \%$ | 6 | $16 \%$ | 38 | $100 \%$ |
| Total | 51 | $60 \%$ | 24 | $28 \%$ | 10 | $12 \%$ | 85 | $100 \%$ |

- Success rates for DSPS in fall 2019 in the Stretch and Standalone courses were relatively high and consistent with prior fall terms (see Table 1 above), the low success rate of $44 \%$ in the Bundle brought down the overall success rate in fall 2019.
- Over $40 \%$ of DSPS students are enrolled in the Bundle course in fall 2019, which has the lowest success rate of all modalities.
- It should also be noted that the Stretch course had the highest success rate, but these students will also need to pass EWRT1T in a subsequent term in order to get transferable credit for EWRT1A, thus the overall success rate may be lower after the second term.

|  | Total | 51 | 60\% | 24 | 28\% | 10 | 12\% | 85 | 100\% |

- When disaggregating student success by type of disability and course type, it is a case by case basis for how students perform in each course, as the sample is small in many cases. However, students with Learning Disabilities are present in each of the three course types, and these students have the highest success rate in the standalone EWRT1A course at $85 \%$ success. This is also the case for students who are Deaf and Hard of Hearing.

- DSPS students in any learning community within any EWRT course type had consistently higher success rates in learning community sections. For example, DSPS success rates in the Bundle course overall were $44 \%$, but in the Bundle learning community, success rates were $78 \%$ compared to $33 \%$ for DSPS students in the Bundle without the learning community. This is also the case for the Stretch course, $86 \%$ success compared to $60 \%$.

Table 5. MATH10 - Success by DSPS Status

- When comparing DSPS students to non-DSPS students in MATH10 courses, DSPS students overall exhibited a lower success rate than their counterparts historically, but this fall, success rates were very similar between the two groups.

Table 6. MATH10 - Success by DSPS Status - Fall 2019

| Total | 43 | $67 \%$ | 16 | $25 \%$ | 5 | $8 \%$ | 64 | $100 \%$ |

- Similar to EWRT1A, success rates for DSPS were relatively high and consistent with prior fall terms as displayed above in Table 3 in the MPS and Standalone courses, the low success rate of $44 \%$ in the corequisite brought down the overall success rate in fall 2019.
- The smallest population of DSPS students were in the corequisite course in fall 2019 with the majority in the standalone course, who had a $70 \%$ success rate, above the $68 \%$ success rate of nonDSPS students.

| Total |  | 43 | 67\% | 16 | 25\% | 5 | 8\% | 64 | 100\% |

- DSPS students in MATH10 who were in the MPS learning community had somewhat higher success rates, at 73\% compared to students in the standalone course whose success rates were $70 \%$. However, the MPS rates were much higher than the success rates in the coreequisite course for DSPS students which was $44 \%$.

| Fall 2019 | DSPS | 22 | 15 | $68 \%$ |
|  | Non-DSPS | 708 | 414 | $58 \%$ |

- When comparing DSPS students to non-DSPS students in MATH41 courses, DSPS students on average exhibit lower success rates than their counterparts. Though this was not the case in fall 2019, where DSPS students exhibited a success rate 10 percentage points higher than their nonDSPS counterparts.

|  | Non-DSPS | 734 | 510 | $69 \%$ |

- DSPS students, on average have higher success rates than non-DSPS students in MATH1A and this continued to be the case for fall 2019.
- Enrollment of DSPS students in MATH1A more than doubled between fall 2015 and fall 2019, from 10 to 24 students.

- While there were no MATH1A sections offered as a learning community format, DSPS students in MATH1A overall performed very well regardless of their disability, with the exception of students with an Other disability, whose success rates were at $50 \%$.

## Background

In fall 2019 the English and Math departments placed students via high school grade point average (GPA) or guided self-placement. Students with a 2.6 or higher high school GPA were placed directly into EWRT1A, students between a 1.9 and 2.6 were placed into EWRT1A + LART250 (Bundle), and students below a 1.9 GPA were placed into a two term EWRT1AS + EWRT1AT (Stretch). All students were eligible to enroll in MATH10 (Statistics) with the option of enrolling in a course with corequisite support or an MPS section, and students with a 3.3-2.6 GPA in high school were eligible to enroll in Math41 (Precalculus) standalone with an optional corequisite. Students below a 2.6 GPA were required to enroll in a MATH41 course with a corequisite.
