# De Anza College Office of Institutional Research and Planning 

Date: 12/14/2021
To: Math Department
From: Mallory Newell, Office of Institutional Research and Planning
Subject: Completion of College-Level/Transfer-Level Math Within One Year

## Purpose

With the implementation of AB 705 in fall 2019, colleges were given two years to collect data on completion of transferlevel Math within a one-year time frame based on a student's first course of enrollment in the discipline course, below transfer or at transfer level, and their educational goal.

## Methodology

This analysis tracked students, who started for the first time in MATH210/212, MATH114, MATH109 or MATH130 in fall 2019, winter 2020, spring 2020, summer 2020 and fall 2020, to completion of either a college-level or transfer-level course within one year. One year is defined as four terms. For example, a student with a transfer goal who enrolled in MATH114 as their first course of enrollment in the discipline in fall 2019 would be tracked through summer 2020 to completion of any transfer-level Math course. Educational goals of certificate, degree or transfer were reported in the college application or updated in MyPortal. High school GPA data are based on high school transcript information used for assessment and placement into course levels and support. Throughput is defined as successful completion (grades A, $B, C$, or $P$ ) of either the degree or transfer level course. Below transfer-level enrollment is compared to students who started directly at college level or transfer level and successfully completed the course appropriate to their educational goal in one year.

## Summary of Findings:

- For students with an educational goal of certificate, degree or transfer, throughput was maximized when they started directly in either a college-level or transfer-level course, based on their educational goal, when compared to students who started below a college-level course.
- For students with an educational goal of certificate or degree, throughput was maximized across all levels of high school preparation when starting directly in MATH114. However, for students with an educational goal of transfer, throughput was maximized across all levels of high school preparation when students started directly in a transfer-level course, rather than in MATH114.
- For students with an educational goal of certificate/degree or transfer, overall, throughput was maximized when starting directly at transfer-level rather than in MATH109 or MATH130.
- Students in all GPA bands have higher completion rates when enrolled directly into Statistics or Precalculus I with a corequisite than in a pre-transfer-level preparation course.

Successful Completion of Transfer-Level Math within One Year - Students Starting in MATH210 or MATH212

| Table 1. Students with a Degree or Certificate Goal |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Students Whose First Course of Enrollment was MATH210/212 |  |  | Students Whose First Course of Enrollment was at Transfer Level |  |  | Throughput Rates |  |
| MATH212: <br> Beginning Algebra or MATH210: PreAlgebra | Total Enrolled | Subtotal who Completed College-Level or Higher within One Year | Throughput Rate | Total Enrolled | Subtotal who Completed College-Level or Higher within One Year | Throughput Rate | Throughput Rate Differences | Maximize Throughput? |
| Overall | 35 | 9 | 25.7\% | 330 | 252 | 76.4\% | -50.6\% | No |
| GPA Unknown | 2 | 0 | 0.0\% | 5 | 4 | 80.0\% | -80.0\% | No |
| Highest GPA Band | 2 | 1 | 50.0\% | 118 | 102 | 86.4\% | -36.4\% | No |
| Middle GPA Band | 19 | 6 | 31.6\% | 145 | 113 | 77.9\% | -46.4\% | No |
| Lowest GPA Band | 12 | 2 | 16.7\% | 62 | 33 | 53.2\% | -36.6\% | No |

| Table 2. Students with a Transfer Goal |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Students Whose First Course of Enrollment was MATH210/212 |  |  | Students Whose First Course of Enrollment was at Transfer Level |  |  | Throughput Rates |  |
| MATH212: <br> Beginning Algebra or MATH210: PreAlgebra | Total Enrolled | Subtotal who Completed Any Transfer Level Course in One Year | Throughput Rate | Total Enrolled | Subtotal who Completed Any Transfer Level Course in One Year | Throughput Rate | Throughput Rate Differences | Maximize Throughput? |
| Overall | 144 | 29 | 20.1\% | 6181 | 4970 | 80.4\% | -60.3\% | No |
| GPA Unknown | 9 | 2 | 22.2\% | 51 | 38 | 74.5\% | -52.3\% | No |
| Highest GPA Band | 18 | 8 | 44.4\% | 2661 | 2384 | 89.6\% | -45.1\% | No |
| Middle GPA Band | 62 | 14 | 22.6\% | 2336 | 1858 | 79.5\% | -57.0\% | No |
| Lowest GPA Band | 55 | 5 | 9.1\% | 1133 | 690 | 60.9\% | -51.8\% | No |

As displayed in Tables 1 and 2, throughput was maximized when students started directly in either a college-level math course or a transfer-level math course, based on their educational goal.

- Students with a certificate/degree goal who start in MATH210/212 complete a college level or higher math course within one year at a rate of $25.7 \%$. Comparatively, students who started directly at college level, completed a college-level or transfer-level math course at a rate of $76.4 \%$, a difference of $-50.6 \%$ points.
- Students with a transfer goal who started in MATH210/212 completed a transfer-level math course within one year at a rate of $20.1 \%$ compared to $80.4 \%$ for students who started directly at transfer level.
- When looking at students in the lowest GPA band, and an educational goal of certificate/degree, those who enrolled directly in a college-level math course had a $53.2 \%$ completion rate ( 62 students), or $36.6 \%$ points above similarly prepared students who started below college level.
- Students in the lowest GPA band with a transfer goal, who enrolled directly into a transfer-level course, had a completion rate of $60.9 \%$ ( 1,133 students), or $51.8 \%$ points above similarly prepared students who start below degree level. This finding suggests students with the lowest level of high school preparation, do well when placed directly into transfer-level math courses.

## Successful Completion of Transfer-Level Math within One Year - Students Starting in MATH114

| Table 3. Students with a Degree or Certificate Goal |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Students Whose First Course of Enrollment was MATH114 |  |  | Students Whose First Course of Enrollment was at Transfer Level |  |  | Throughput Rates |  |
| Math114: Intermediate Algebra | Total Enrolled | Subtotal who Completed College-Level or Higher in One Year | Throughput Rate | Total Enrolled | Subtotal who Completed College-Level or Higher in One Year | Throughput Rate | Throughput Rate Differences | Maximize Throughput? |
| Overall | 121 | 101 | 83.5\% | 330 | 252 | 76.4\% | 7.1\% | Yes |
| GPA Unknown | 1 | 1 | 100.0\% | 5 | 4 | 80.0\% | 20.0\% | Yes |
| Highest GPA Band | 18 | 17 | 94.4\% | 118 | 102 | 86.4\% | 8.0\% | Yes |
| Middle GPA Band | 73 | 66 | 90.4\% | 145 | 113 | 77.9\% | 12.5\% | Yes |
| Lowest GPA Band | 29 | 17 | 58.6\% | 62 | 33 | 53.2\% | 5.4\% | Yes |

| Table 4. Students with a Transfer Goal |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Students Whose First Course of Enrollment was MATH114 |  |  | Students Whose First Course of Enrollment was at Transfer Level |  |  | Throughput Rates |  |
| Math114: Intermediate Algebra | Total Enrolled | Subtotal who Completed Any Transfer Level Course in One Year | Throughput Rate | Total Enrolled | Subtotal who Completed Any Transfer Level Course in One Year | Throughput Rate | Throughput Rate Differences | Maximize Throughput? |
| Overall | 453 | 127 | 28.0\% | 6181 | 4970 | 80.4\% | -52.4\% | No |
| GPA Unknown | 3 | 0 | 0.0\% | 51 | 38 | 74.5\% | -74.5\% | No |
| Highest GPA Band | 66 | 21 | 31.8\% | 2661 | 2384 | 89.6\% | -57.8\% | No |
| Middle GPA Band | 197 | 45 | 22.8\% | 2336 | 1858 | 79.5\% | -56.7\% | No |
| Lowest GPA Band | 187 | 61 | 32.6\% | 1133 | 690 | 60.9\% | -28.3\% | No |

As displayed in Table 3, for students with an educational goal of certificate/degree, throughput was maximized across all levels of high school preparation when students started directly in MATH114. However, as displayed in Table 4, for students with an educational goal of transfer, throughput was maximized when students, across all levels of high school preparation, started directly in a transfer-level math course, rather than in MATH114.

- Students with a certificate/degree goal who started in MATH114 and completed MATH114 or higher within one year had a completion rate of $83.5 \%$. Comparatively, students who started directly at transfer level, completed college-level or transfer-level math at a rate of $76.4 \%$, a difference of $7.1 \%$ points.
- Students with a transfer goal who started in MATH114 completed a transfer-level course within one year at a rate of $28.0 \%$ compared to $80.4 \%$ for students who started directly at transfer level.
- Among students with a transfer goal in the lowest GPA band, those who enrolled directly in a transfer-level math course completed a transfer-level course at a rate of $60.9 \%$ compared to similarly prepared students who started at MATH114 and had a transfer-level math completion rate of $32.6 \%$, a $-28.3 \%$ point difference.

## Successful Completion of Transfer-Level Math within One Year - Students Starting in MATH109

| Table 5. Students with a Degree or Certificate Goal |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Students Whose First Course of Enrollment was MATH109 |  |  | Students Whose First Course of Enrollment was at Transfer Level |  |  | Throughput Rates |  |
| MATH109 - <br> Statistics <br> Preparation - <br> Degree Applicable | Total Enrolled | Subtotal who Completed College-Level or Higher in One Year | Throughput Rate | Total Enrolled | Subtotal who Completed College-Level or Higher in One Year | Throughput Rate | Throughput Rate Differences | Maximize Throughput? |
| Overall | 5 | 3 | 60.0\% | 330 | 252 | 76.4\% | -16.4\% | No |
| GPA Unknown |  |  |  | 5 | 4 | 80.0\% |  |  |
| Highest GPA Band | 1 | 1 | 100.0\% | 118 | 102 | 86.4\% | 13.6\% | Yes |
| Middle GPA Band | 2 | 1 | 50.0\% | 145 | 113 | 77.9\% | -27.9\% | No |
| Lowest GPA Band | 2 | 1 | 50.0\% | 62 | 33 | 53.2\% | -3.2\% | No |

| Table 6. Students with a Transfer Goal |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Students Whose First Course of Enrollment was MATH109 |  |  | Students Whose First Course of Enrollment was at Transfer Level |  |  | Throughput Rates |  |
| MATH109 - <br> Statistics <br> Preparation - <br> Degree Applicable | Total Enrolled | Subtotal who Completed Any Transfer Level Course in One Year | Throughput Rate | Total Enrolled | Subtotal who Completed Any Transfer Level Course in One Year | Throughput Rate | Throughput Rate Differences | Maximize Throughput? |
| Overall | 37 | 8 | 21.6\% | 6181 | 4970 | 80.4\% | -58.8\% | No |
| GPA Unknown |  |  |  | 51 | 38 | 74.5\% |  |  |
| Highest GPA Band | 6 | 1 | 16.7\% | 2661 | 2384 | 89.6\% | -72.9\% | No |
| Middle GPA Band | 18 | 6 | 33.3\% | 2336 | 1858 | 79.5\% | -46.2\% | No |
| Lowest GPA Band | 13 | 1 | 7.7\% | 1133 | 690 | 60.9\% | -53.2\% | No |

As displayed in Table 5, for students with an educational goal of certificate/degree, throughput was maximized for students in the highest GPA band when starting in MATH109 rather than at transfer level, though this is a sample size of 1. For all other GPA bands, throughput was maximized when students started directly at transfer level, though their comparison group represents only 2 students in each high school GPA band.

As displayed in Table 6, for students with an educational goal of transfer, throughput was maximized when students, across all levels of high school preparation, started directly in a transfer level course, rather than in MATH109.

## Successful Completion of Transfer-Level Math within One Year - Students Starting in MATH130

| Table 7. Students with a Degree or Certificate Goal |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Students Whose First Course of Enrollment was MATH130 |  |  | Students Whose First Course of Enrollment was at Transfer Level |  |  | Throughput Rates |  |
| MATH130: Intermediate Algebra for Precalculus | Total Enrolled | Subtotal who Completed College-Level or Higher in One Year | Throughput Rate | Total Enrolled | Subtotal who Completed College-Level or Higher in One Year | Throughput Rate | Throughput Rate Differences | Maximize Throughput? |
| Overall | 12 | 8 | 66.7\% | 330 | 252 | 76.4\% | -9.7\% | No |
| GPA Unknown | 0 | 0 |  | 5 | 4 | 80.0\% |  |  |
| Highest GPA Band | 0 | 0 |  | 118 | 102 | 86.4\% |  |  |
| Middle GPA Band | 7 | 6 | 85.7\% | 145 | 113 | 77.9\% | 7.8\% | Yes |
| Lowest GPA Band | 5 | 2 | 40.0\% | 62 | 33 | 53.2\% | -13.2\% | No |

| Table 8. Students with a Transfer Goal |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Students Whose First Course of Enrollment was MATH130 |  |  | Students Whose First Course of Enrollment was at Transfer Level |  |  | Throughput Rates |  |
| MATH130: <br> Intermediate <br> Algebra for <br> Precalculus | Total Enrolled | Subtotal who Completed Transfer-Level Course in One Year | Throughput Rate | Total Enrolled | Subtotal who Completed Transfer-Level Course in One Year | Throughput Rate | Throughput Rate Differences | 8. Maximize Throughput? |
| Overall | 90 | 35 | 38.9\% | 6181 | 4970 | 80.4\% | -41.5\% | No |
| GPA Unknown | 2 | 2 | 100.0\% | 51 | 38 | 74.5\% | 25.5\% | Yes |
| Highest GPA Band | 10 | 5 | 50.0\% | 2661 | 2384 | 89.6\% | -39.6\% | No |
| Middle GPA Band | 38 | 17 | 44.7\% | 2336 | 1858 | 79.5\% | -34.8\% | No |
| Lowest GPA Band | 40 | 11 | 27.5\% | 1133 | 690 | 60.9\% | -33.4\% | No |

As displayed in Table 7, for students with an educational goal of certificate/degree, overall, throughput was maximized when students started at transfer level. However, throughput was maximized for students in the middle GPA band when starting in MATH130 rather than at transfer level (7 students). For students in the lowest GPA band, throughput was maximized when students started directly at transfer level, rather than in MATH130 (5 students).

As displayed in Table 8, for students with an educational goal of transfer, overall, throughput was maximized when students started directly in a transfer level course, rather than in MATH109. However, students with an unknown GPA do benefit from enrolling into MATH130 over direct transfer level, though the sample size is 2.

Successful Completion of Transfer-Level Math with a Corequisite within One Year

| Table 9. Students with a Transfer Goal |  |  |  |
| :--- | :---: | :---: | :---: |
|  | Students Whose First Course of <br> Enrollment was MATH31/41 |  |  |
| MATH31/41: <br> Precalculus I | Total <br> Enrolled | Subtotal <br> who <br> Completed <br> Transfer- | Throughput <br> Rate |
| Level Course |  |  |  |

| Year |  |  |  |$]$.

- When comparing students who enrolled Precalculus I with or without support, students who enrolled in the standalone course had higher success rates in all GPA bands in comparison to students in the corequisite course.
- When comparing Precalculus I with support to completion rates of students who start in MATH130 (Precalculus Preparation), students who start directly in Precalculus with a corequisite have higher completion rates in all GPA bands than students who start in MATH130, $66.5 \%$ compared to $38.9 \%$, respectively.
