Subject: Math Early Assessment Program (EAP) Students
All high school juniors are required to take the EAP exam in the spring of their junior year as part of the Smarter Balanced test. The purpose of the exam is to inform students and parents of the student's readiness for college-level work. If a student is found to "exceed the standard" they are eligible for college-level work in either English or math at any California State University (CSU) campus. The student does not need to take a placement test at the CSU or take any developmental courses.

The California Community College Chancellor's Office has also approved the use of EAP scores in lieu of a placement test for students who meet the standard:
http://extranet.cccco.edu/Portals/1/SSSP/Matriculation/Assessment/Clarification\ SAT\  ACT\%207-1-2015.pdf. The CCCO maintains a list of current community colleges who use the EAP exam as an alternative to placement:
http://extranet.cccco.edu/Divisions/StudentServices/EAP/AcceptingEAP.aspx.
For this analysis, only students who "exceed the standard" in math were included and are thus eligible for college-level math at a CSU campus. In addition, only the first math course in which they enrolled was included. Currently, De Anza does not accept EAP scores for either English or Math, so these students were required to take a placement test prior to enrolling in either subject or show equivalency.

Note: Enrollment was tracked between 2012-13 and 2015-16.
Table 1 displays the number of students who attended a Santa Clara high school and met the standard in math. For students who took the test in spring 2015, they would likely not enroll until fall 2016, though some students may attend sooner to take college-level courses (see Table 2).

- In spring 2013, 1,837 students were eligible for college-level math. Of these, 13\% or 246 enrolled in a math course at De Anza by spring 2016.
- In spring 2014, 1,257 students were eligible for college-level math and $11 \%$ or 142 enrolled in a math class at De Anza.
- In spring 2015, 1,697 students were eligible for college-level math and $2 \%$ or 41 enrolled in math at De Anza. The bulk of these students will not enroll until fall 2016.

Of the students who met the standard on the EAP exam in spring 2013, 2014, or 2015, Table 2 displays the term in which they enrolled at De Anza College and took their first math course.

- For students who took the EAP exam in spring 2013, 246 enrolled in a math course. Of these students, the majority (17\%) enrolled in summer 2015 followed by 13\% in spring 2016 and $12 \%$ in fall 2015.
- For students who took the EAP exam in spring 2014, 142 have enrolled in a math course with the majority enrolling in spring 2016, $25 \%$, followed by $19 \%$ in winter 2016.
- For the students in the spring 2015 cohort, they would have graduated in spring 2016 with the majority enrolling after that. However, thus far, 41 students have enrolled in a math course already.

Note: Includes only the first math course they enrolled in.
Of the students who met the standard on the EAP exam in spring 2013, 2014 or 2015, Table 3 displays the first course which they enrolled.

- For students who took the EAP exam in spring 2013, the majority (35\%) enrolled in Math 10 as their first course followed by $13 \%$ enrolling in Math 1C.
- For students who took the EAP exam in spring 2014, the majority (30\%) enrolled in Math 10 as their first course followed by $18 \%$ enrolling in Math 1C.
- For students who took the EAP exam in spring 2013, the majority ( $22 \%$ ) enrolled in Math 1C as their first course followed by $17 \%$ enrolling in Math 10.

Note: Includes only the first math course they enrolled in.
Of the students who met the standard on the EAP exam in spring 2013, their overall course success rate was $80 \%$.

- All students except 3 enrolled in a college-level course as their first course, these students would have been cleared from taking a placement exam and could enroll directly into a college-level course.
- The 3 students who enrolled in Math 114 would have been exempt from taking this course. All three of these students successfully completed the course.
